

Expedition™

SPACE HEATER

The **Expedition** diesel heater delivers the ultimate in clean, efficient heat and requires no electricity. A diesel heater means low maintenance, simple to light and operate, with no chopping wood or hauling heavy propane tanks as with other types of heaters. On low, a five gallon jerry can will last 25 hours on readily available diesel fuel. There's no getting up at night to feed a wood stove or change a propane tank and harmful exhaust gases are vented up an exhaust stack for safety. All steel construction means a durable and reliable product that will provide years of trouble free service. **Expedition** heaters will keep you warm and comfortable in your cabin, garage and workshop or in a tent when you're hunting, fishing and you need portable or emergency heat.

The **Expedition** measures 15"W X 18"D X 30"H and weighs 40 lbs without an exhaust stack. It uses a vaporizing burner and is controlled by a fully adjustable fuel regulator. The heat output can be adjusted from 10,000 BTU/h to 30,000 BTU/h (0.3 US gal/h fuel consumption on high). The **Expedition** also incorporates multiple operational safety features such as a patented non flooding burner, fuel regulator with overheat protection, and a fuel shutoff valve. A galvanized heat shield is attached to the heater to protect the user from incidental contact.

Floor Size Heating Ability	Low Setting	High Setting
Room with poor insulation, temperate/mild weather	300 sqft	900 sqft
Room with poor insulation, cold weather	240 sqft	800 sqft
Room with avg. insulation, temperate/mild weather	340 sqft	1200 sqft
Room with avg. insulation, cold weather	300 sqft	900 sqft
Tent with no insulation, cold weather	100 sqft	240 sqft

*General guideline for portable structure/building with 8 foot ceiling only. Other factors like quantity and size of windows and exterior walls will affect above numbers.

Features:

Rugged, Durable Design
 Heating and Stove Capabilities
 No Electricity Required
 Certified to CSA/UL Standards

Includes:

Galvanized Steel Heat Shield
 4" Exhaust Opening
 Natural Draft Vaporizing Burner
 Primer Bulb
 Burner Cleaning Tool
 Steel Construction
 Fuel Regulator
 Draft Regulator

Optional Accessories:

Fuel Jerry Can 10 Feet Fuel Supply Line with Filter Exhaust Adapters (5"and 6")
 4" Exhaust Kit For Temporary Structure or Tent Use Only

ITR Burner Technology is used by the US Military
